

NOW HIRING

Patriot Field Technologies

WWW.PELINERS.COM

SENIOR FIELD MAPPING & MONITORING TECHNICIAN

Looking for a candidate with automation or monitoring experience

Would piloting drones and remote controlled sonar boats to scan and map field assets interest you?

How about being trained to manage simple but powerful connected technologies to assist our current and future clients with monitoring critical field assets?

If you have a good base of technical, electronic or communication troubleshooting skills in the area of monitoring or automation and have at least some experience in a lead or training role, we can get you get trained to take a lead role in effectively operating and installing our monitoring equipment systems and sensors, we can have you up and running very quickly!

Patriot is a leading provider of frac pit containment construction & lining and operates a Field Technologies division. We are looking to hire and train for the role of: **Senior Mapping & Monitoring Field Technician**

What would you be doing?

Working under the direction of our Op's Manager and Field Supervisor and helping lead & train other field techs, you would assist our team with:

- Aerial mapping of frac pits and other field assets utilizing our drone fleet
- Sub-Surface mapping of frac ponds with our unmanned sonar boat fleet
- Capture GPS, elevation data and photos/videos to support mapping projects
- Assemble and test our custom field asset monitoring systems
- Install and calibrate monitoring assets and connect sensors and flow meters
- Preventative maintenance and service repairs of customer systems
- Following up and auditing other Field Technicians work
- Be trained as future trainer and knowledge resource for Field Technicians
- Help identify & qualify new candidate for Field Technician roles

What you can count on!

- An oilfield position that you don't sell your soul to (be home 95%+ evenings)
- An interesting job where you can learn new technical skills
- Access to the tools, equipment, and reliable field trucks you need
- A place where your ideas and innovation are supported
- Advancement opportunities with a career path for the right fit
- Competitive hourly rate (based on knowledge, skill and experience), overtime opportunities and benefits
- Milestone bonuses related to your progress and results

What you bring to the table?

- Experience in monitoring or automation systems and sensor technologies
- You have a good attitude and can show up and lead by example
- Able to work in a team environment or alone as needed
- Desire to be trained as a future leader / trainer of other technicians
- Able to work in a team environment or alone as needed
- Willingness to be trained and follow procedures for success
- Above average computer and technical skills are helpful
- Ability to work toward defined goals (Part 107 Drone License, etc.)
