2023	0.72	0.0	216,86

What We Do... Where We've Worked!

MORE ABOUT US

Patriot Environmental LLC is an Oklahoma Limited Liability Company that was established in December of 2014. We have offices in both Oklahoma and the Permian Basin, but serve anywhere east of the Mississippi. We specialize in geosynthetic installation and related containment services.

Our owners began lining fresh water pits in 2008 as entry level installers. Both moved up through the ranks as installers, crew leaders, salesmen, and then managers before deciding to break out on their own and start Patriot Environmental.

The culture at Patriot Environmental is one based on experiences learned and hard work. We believe in doing the job the right way the first time. We employ some of the most experienced hard working crews in the business, are able to leverage decades of direct industry experience and constantly looking to innovate and exceed expectations.
