

NOW HIRING

Looking for a unique opportunity in the oil & gas field technical services sector?

Would piloting drones and remote controlled sonar boats to scan and map field assets interest you? How about being trained to manage simple but powerful connected technologies to assist companies in monitoring field assets?

If you have even basic technical skills we can train you! We will you get licensed for safely and effectively operating and installing our equipment and systems and can have you up and running very quickly!

Patriot is a leading provider of frac pit containment construction & lining and operates a Field Technologies division. We are looking to hire entry to mid-level Mapping & Monitoring Technicians to be based out of our Permian Field Office in West Odessa.

What would you be doing?

Working under the direction of our Field Supervisor and alongside other techs, you would assist our clients with:

- Mapping of frac pits and other field assets utilizing unmanned aerial drones
- Sub-Surface mapping of frac pits with unmanned sonar boats
- Capture GPS, elevation data and photos/videos to support mapping projects
- Assemble and test our custom field asset monitoring systems
- Install and calibrate monitoring assets and connect sensors and flow meters
- Preventative maintenance and service repairs of customer systems
- Cross training to assist with a variety of office, shop and field activities

What you can count on!

- An oilfield position that you don't sell your soul to (be home 95%+ evenings)
- An interesting job where you can learn new technical skills
- Access to the tools, equipment, and reliable field trucks you need
- A place where your ideas and innovation are supported
- Advancement opportunities with a career path for the right fit
- Competitive hourly rate (based on knowledge, skill and experience), overtime opportunities and benefits
- Milestone bonuses related to your progress and results

What do you bring to the table?

- All levels of education considered
- Solid to above average computer and technical skills is helpful
- Good attitude and able to work in a team environment or alone as needed
- Willingness to be trained and follow procedures for success
- Ability to work toward defined goals (Part 107 Drone License, etc.)
- Milestone bonuses related to your progress and results
- Clean driving record and able to pass standard drug testing
